Programs

Choose your direction — from programming foundations to production-grade AI systems. Every program blends concepts, hands-on practice and career readiness.

Py

Python

Build a strong base in a versatile programming language known for simplicity and readability — the starting point of every AI journey.

FOUNDATION

AI

AI & Machine Learning

Learn transformative technologies driving innovation across industries, with a practical, project-first focus.

CORE PROGRAM

◈

Agentic AI/LLMOps

Develop an understanding of how machine learning and large language model systems move into production — deployment, monitoring and operations.

ADVANCED

✦

Generative AI

Explore AI systems that create new content — including text, images, music and more — using modern generative models.

TRENDING

AI

AI Viddya Learning Engine

Our structured learning path takes you from concepts to career — every program flows through one proven engine.

LEARN BUILD APPLY

Industrial Training

Connect technical learning with practical applications and industry expectations.

AI Solutions

Purpose-fit intelligent experiences; bring language models into real business workflows.

Cloud Solutions

Plan, deploy and operate AI/ML workloads on cloud platforms.

Why AI Viddya?

OUR MISSION

Bridge theoretical concepts and practical applications through a comprehensive learning experience — so every learner walks out job-ready.

1 **Practice before promises**
Real projects and hands-on labs in every module — you build a portfolio, not just notes.

2 **Industry perspective**
Curriculum shaped by what technology teams actually expect from new hires.

3 **Career direction**
Structured guidance from first concept to interview readiness and placement support.

4 **Current technology**
Gen AI, LLMs and Agentic AI — the stack companies are hiring for right now.

5 **Accessible pathway**
Start from Python basics or jump into advanced tracks — there is a path for every level.

6 **Business solutions**
Training, placement and IT product solutions for teams and enterprises.

Start your AI journey today.
